Sustainable filming

SUSTAINABLE FILMING CODE OCTOBER 2026

No single-use plastic. What we can reuse, we reuse.

A shoot uses a lot of energy, material and kilometres. This code describes how we deal with that on set and at the office. It only contains what we already do. Anything not in place yet is marked separately and has a deadline: 2028.

IN PLACE TODAY

Office and storage

WASTE

We sort paper, plastic, glass, metal and organic waste.

PRINTING

Call sheets, scripts and contracts go out electronically. We print only what has to be on paper, and we print it on recycled or FSC-certified paper.

GEAR

We repair our gear. What we no longer need, we sell on.

PROPS AND MATERIALS

After the shoot we donate them or use them again.

NOT IN PLACE YET · COMMITMENT BY 2028

At the office we will buy electricity from a supplier that guarantees renewable sources.

We will use only eco-labelled cleaning products.

IN PLACE TODAY

Prep and shoot

ENERGY

We light with LEDs and use rechargeable batteries. The generator runs only when there is no other way.

PLASTIC

There are no PET bottles and no single-use plastic tableware on set. The crew have their own bottles and cups. Where single-use tableware cannot be avoided, we use paper instead of plastic.

TRANSPORT

The crew travel together or by public transport. We take as few cars as possible and skip unnecessary trips.

CATERING

Tableware is washable or compostable. Food comes from local suppliers and follows the season.

WASTE

We sort on set as well.

CREW MEMO

With the call sheet, the crew get a memo with the rules of sustainable filming.

EVERY SHOOTING DAY

On-set checklist

SHOOT _____ DATE _____ SHOOTING DAY _____ FILLED IN BY _____

BEFORE THE SHOOT

- [ ] The call sheet went out to the crew electronically.
- [ ] The memo with the rules of sustainable filming went out with the call sheet.
- [ ] The crew travel together or by public transport, with as few cars as possible.

ENERGY

- [ ] We are lighting with LEDs.
- [ ] Batteries are rechargeable.
- [ ] The generator runs only when there is no other way.

WATER, TABLEWARE AND FOOD

- [ ] There are no PET bottles on set.
- [ ] The crew have their own bottles and cups.
- [ ] Tableware is washable or compostable. Any single-use items are paper, not plastic.
- [ ] Food is from a local supplier and in season.

WASTE

- [ ] Waste is sorted on set.

AFTER THE LAST SHOOTING DAY

- [ ] Props and materials are donated or used again.

WHAT DID NOT WORK AND WHY
